

Offering the 'everything customer' the multi-experience

 By Leigh Andrews

17 Sep 2019

Continuing the opening keynote from the first morning of Gartner Symposium 2019, Don Scheibenreif, distinguished VP analyst at Gartner, explained the concept of the 'everything consumer' and why we need to offer them the all-new multi-experience.

It's a strange time to live in, with Scheibenreif saying to think for a minute with your consumer hat on - you both want to be connected with and left alone by brands.

Technology has made this more complicated in creating the 'everything customer'.

Meet the 'everything customer'

The everything consumer needs the 'ultimate experience' from your brand, no matter which device or touchpoint is used to interact.

“ *Customers want everything.*

The everything customer. [#GartnerSYM](#)— Deon Engelbrecht (@deon_engel) [September 16, 2019](#) ”

This means they don't want to be limited to your call centre, mobile app or website for certain services.

#GartnerSYM: Avoid disruption, reach 'techequilibrium' in any industry

Leigh Andrews 16 Sep 2019

Scheibenreif says to take this sentiment further within the company by tapping into the new kinds of talent now accessible as we hire younger generations.

“ Scheibenreif says a multiexperience mindset is needed to meet the needs of the "everything customer," who want companies to meet them where they are, not simply via an app or website. [#GartnerSYM pic.twitter.com/KZvzdJWXiC](#)— Hypertext (@htxtafrica) [September 16, 2019](#) ”

This will help brands better understand the moments of delight and pain points alike from the expected and unexpected parts of the customer journey.

“ Now Gartner is talking customers, who "want everything" according to Don Scheibenreif. This presents a technology challenge for many CIOs, he adds. [#GartnerSYM pic.twitter.com/0wZh0h9ADC](#)— Hypertext (@htxtafrica) [September 16, 2019](#) ”

We need to listen to what our customers do and don't say, and now deliver to a wider universe of demands than ever before.

Looking specifically to consumer cohorts, Scheibenreif said 'Gen Z, the next generation of customers, will be considered adults by the year 2021, which is just around the corner.

“ Gartner [@donscheibenreif](#) tells the 1,100 [#GartnerSYM](#) attendees: « Generation Zed. The next generation of customers will be 21 years old by 2021. 61 million people, with their own clear set of principles. ». [#CapeTown #CIO pic.twitter.com/fSwY8Nu9NI](#)— Gartner IT Symposium/Xpo™ (@Gartner_SYM) [September 16, 2019](#) ”

Gen Z values identity more highly than any other age group, with evolving fashion and beauty trends calling for more inclusive design.

Scheibenreif pointed out that we now finally have plasters that match more skin tones than ever before, such as the Plasta brand, which was started in South Africa.

“ Buffy the vampire slayer needs [@PlastaSA](#) stash. [pic.twitter.com/TpSi4hX4OY](#)— Lee 💎💎 (@LeeTheRabbit) [October 27, 2015](#) ”

Offering the 'multi-experience'

Being inclusive leads to better value, as your brand is a better fit for the diverse society of today.

But what if your future customer is not 100% human, asks Scheibenreif. For example, HP created [InstantInk](#), where the printer itself orders its own ink (from HP, of course), when its levels start running low.

The future of app development is multi-experience

8 Apr 2019

That's just one example of smart devices and the rise of the internet of things (IoT).

Taking this further, we need to think beyond the call centre as the main customer interface and ensure all touchpoints are as technologically advanced as possible.

Customers expect service anywhere, any time

Take the US, as an example - there are already currently 10 ways to book a flight - even via Instagram, and 15 ways to

order pizza - even through your smart TV.

Insert the shocked-face emoji, but that's multi-experience in a nutshell.

It goes beyond the tech investment to expecting the unexpected, wrapped in rich digital services.

“ Insights from the [#GartnerSym](#):

- Create experiences that deliver value
 - Plan Multi Experience solutions for citizens/customers
 - How you will serve AI intermediaries (robots as customers)
 - CIO's must take a Product Centric approach, as traditional IT infrastructure is outdated— Aslam (@Aslam_Levy)
- [September 16, 2019](#) ”

Scheibenreif concluded that to succeed, brands need to decide to connect with the everything customer, then design and shape inclusive experiences for them, and drive these in the multi-experience platform.
