

Averda secures ESG status upgrade

Averda has announced that its environmental, social and governance (ESG) rating has been upgraded by Sustainalytics, one of the leading global ESG rating agencies. The company secured the highest rating amongst its peers in the facilities maintenance sub-industry with an overall ESG risk rating of Low due to the improved management of its material issues as identified by the rating agency.

Averda is a waste management and recycling company operating in India, the Middle East and Africa. It provides a wide range of waste and recycling services to over 60,000 clients, large and small, across the private and public sectors.
