

# Emirates boosts connectivity to Mauritius with third daily flight

Emirates has announced plans to up frequencies to Mauritius starting 1 October 2022. The additional evening frequency which will operate up till 31 January 2023 is in response to increased travel demand to and from Mauritius and will boost connectivity to the island nation.

Emirates' third daily flight to Mauritius will operate with the following schedule (all timings local): EK 709 departs Dubai at 10.10pm hrs and arrives in Mauritius at 04.45am. EK 710 leaves Mauritius at 6.30am, arriving in Dubai at 1.05pm.

The third daily flight will boost seat capacity to and from Mauritius by approximately 35%, catering to the surge in demand and providing added support to the tourism industry during one of the busiest travel seasons.

The added frequency supplements the existing double-daily Airbus A380 services and will also offer customers travelling to Mauritius with more flexibility when planning their trip with the choice of an early morning arrival at Sir Seewoosagur Ramgoolam International Airport in addition to the existing EK 0701 service which arrives mid-morning, and EK 0703 that arrives early evening.

Travellers departing Mauritius will also have ample choice to connect safely and seamlessly to Dubai, and through Dubai onwards to Emirates' global network of 130 destinations.

All three daily flights offer code sharing with Air Mauritius to allow greater access and a seamless travel experience to and from the island nation.

HH Sheikh Ahmed bin Saeed Al Maktoum, chairman and chief executive, Emirates Airline and Group says: "We thank the Mauritian authorities for considering our request to operate a third daily flight. Air connectivity is critical to international tourism, and these extra seats will help us bring even more visitors from across our network to Mauritius, and accommodate rising demand. Emirates is committed to playing a key role to promote inbound travel, and support the government in achieving its goal of hosting 1.4 million tourists by June 2023."
