

Singularity University Summit comes to South Africa

Singularity University empowers the global community with the mindset, skill set and network to create an abundant future. For the first time in South Africa, leading-edge speakers from SingularityU will join South African leaders, change makers, entrepreneurs and innovators for an unforgettable experience on 23-24 August 2017 in Johannesburg.

The summit will include sessions on renewable and exponential energy sources, as well as space flight and what life on Mars will be like. Mxolisi Mgojo, CEO of Exxaro, will be speaking about the future of work. While Ramez Naam will talk about exponential energy.

The SingularityU South Africa Summit will convene exponential thought leaders, SU faculty, and organisations from around the world to provide participants with insights into emerging exponential technologies and how they can be used to create positive change and economic growth across the continent.

This unique summit will present a display of disruptive technologies, extensive debate, and collaborative discussions. It will offer an exchange of new ideas and future innovations in the fields of healthcare, cyberspace, AI, robotics, big data, finance, and design.

The Singularity University faculties from Silicon Valley and around the world, as well as South Africa's most forward-thinking leaders will mix with African entrepreneurs, technologists in a paradigm-shifting learning experience. The speakers come from all walks of life, from finance and education to healthcare and exponential energies.

Singularity University Summit South Africa in collaboration with sponsors Standard Bank, global partners Deloitte and strategic partners MTN and S.A.P, and produced by Mann Made Media.
