

Teaching students to ethically co-create with Al in arts education

By Francois Smit, issued by AFDA

23 Feb 2024

Artificial intelligence increasingly impacts and transforms creative industries.

Arts educators serve a vital role in ensuring students deeply understand these technologies and can critically evaluate their usage. Rather than viewing AI systems as 'black boxes' that simply output art and media, students should scrutinise how large language models function, probe their limitations, and identify potential harms stemming from biases or lack of transparency.

Constructively integrating AI into coursework guides students to think through necessary ethical precautions and can inspire rich conversations around human vs automated creation. Equipping learners to ethically co-create with AI as a tool, not as a replacement for human imagination and expression, will empower the next generation of writers, designers, and creative professionals to harness its potential while proactively addressing risks.

Here are some best practices for incorporating AI critically into arts curricula:

Tips:

- · Have open conversations about promises and perils
- · Teach how systems work and their capabilities and limits
- Use AI tools transparently to augment creativity
- · Develop acceptable use policies and governance
- · Consult experts in AI ethics and include student input

Examples:

- Lectures on how language models work, training data, and capabilities
- · Assignments analysing biases/shortcomings of Al-generated art
- Using AI drafts and outlines to promote creativity with human refinement
- · Requiring ethical development practices for student AI projects

Useful readings:

- Tegmark: Constructive ways forward on AI safety: https://futureoflife.org/ai-policy/written-statement-of-dr-max-tegmark-to-the-ai-insight-forum/
- Meese & Pinto: Implications of generative AI for cultural industries: https://hbr.org/2023/04/how-generative-ai-could-disrupt-creative-work
- Jiang & Villeneuve: Diversity and accessibility in algorithmic creativity: https://www.ilo.org/wcmsp5/groups/public/---dgreports/---dcomm/---publ/documents/publication/wcms 831316.pdf

Equipping students to ethically co-create with AI as a tool guides them to harness its potential while addressing risks. Educational activities centred on critical analysis of outputs surface meaningful deficiencies for exploration. This foundation facilitates informed advocacy and leadership surrounding AI's progress to positively shape its integration across creative industries.

ABOUT FRANCOIS SMIT

We sell computers, printers, laptops and most peripherals. We also do installations of networks and troubleshooting and fixing of computers and printers. View my profile and articles...

- * Afda graduation film Anguish shortlisted for Sony Future Filmmaker Awards 2024 29 Apr 2024
- * Afda alumni in key roles on film which inspired Beyoncé's new album Cowboy Carter 5 Apr 2024
- * Teaching students to ethically co-create with Al in arts education 23 Feb 2024
- "11 Afda films selected to screen at Joburg Film Festival 20 Feb 2024
- * Afda students and alumni top Loeries Official Rankings 2023 12 Feb 2024

AFDA

AFDA is a Private Higher Education Institution owned by Stadio Holdings, which offers Higher Certificate and Degree programmes that are registered by the Department of Higher Education and Training (DHET) and the South African Qualifications Authority (SAQA).
